The scoring process for the CISA exam has changed effective with the June 2007 exam administration. Beginning with the June 2007 exam, ISACA will provide CISA exam scores on a scale from 200-800, with the passing score set at 450. A scaled score is a conversion of a candidate's raw score on an exam to a common scale. A score of 450 represents a minimum consistent standard of knowledge as established by ISACA's CISA Certification Board.

Your next step is to carefully read the enclosed Application for CISA Certification, which can also be downloaded at [www.isaca.org/cisaapp](http://www.isaca.org/cisaapp). If you find that you meet the experience requirements, please complete and return the application to ISACA with the appropriate supporting documentation. Please note that your present or prior employer must verify the work experience you submit on the Verification of Work Experience form included with the application. We recommend that you collect and send all of your supporting documentation at the same time. If you have not yet obtained the required experience, you have five years from the date of the exam to submit your completed application and supporting documentation. **Until your application is received and approved, you are not CISA certified and cannot use the designation.**

Again, congratulations on your achievement. We look forward to you joining the more than 50,000 professionals who have earned the CISA credential.
